# AppOptics: Seamless Application and Infrastructure Monitoring

*TRACE transactions. TRACK metrics. TRANSFORM your data.*

AppOptics™ is the SolarWinds® next-generation Software as a Service (SaaS)-based application performance management (APM) solution. Designed to address the challenges associated with disparate monitoring solutions, AppOptics is a seamless application and infrastructure monitoring solution with distributed tracing, over 150 integrations, and custom metrics that all feed into the same dashboarding, analytics, and alerting pipelines.

FEATURES

Application Performance Monitoring

AppOptics provides real-time visibility into any application by collecting both high-fidelity metrics and detailed transaction traces. Monitor applications across many different languages.

Server and Infrastructure Monitoring

AppOptics removes the divide between application and infrastructure health metrics. Get instant visibility of your most important infrastructure and server metrics.
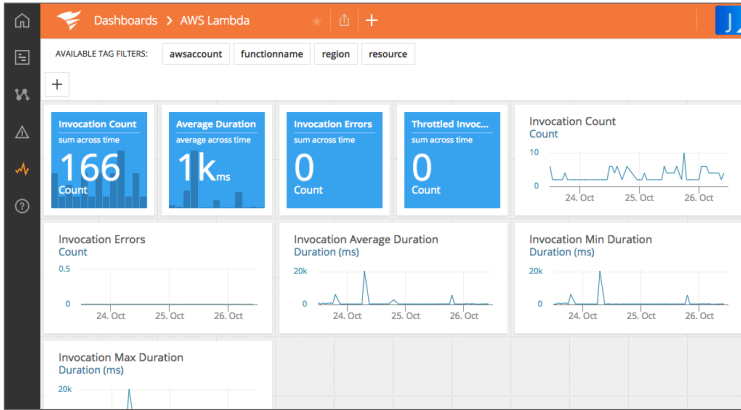

SUPPORTED LANGUAGES AND INTEGRATIONS

APM Languages

Available now: Java®, .NET, PHP, Scala, Ruby and Python®. In beta: Go and Node.js®.

150+ Host Integrations and Plug-ins

The AppOptics host agent is supported by a large, open community with many contributors.
